

# Welding Screen

PVC4Africa supplies yellow PVC welding screen in roll form for the manufacture of safety welding screens. The foil is designed to shield out harmful UV radiation produced by the welding process and is flame retardant to prevent possible fires caused by the welding splatter.

Thickness: 300um  
Width: 1.37m or 2.05m  
Colour: Transparent yellow

UV  
Transmission  
Resistant

Flame  
Retardant

Easy  
Maintenance

ITEM	SPECIFICATION
Product Name	Welding Screen
Colour	Transparent Yellow
Width	1.37m & 2.05m
Roll length	50m
Thickness (um)	300um
Softness	50 phr
Plasticizer	DINP
Heavy Metal Free Raw Materials	The concentration of Cadmium, Lead, Mercury and Hexvalent Chromium do not exceed the maximum concentration as stipulated in EU Directive 2002/95/EC (RoHS).
Fire Retardant	Self extinguishing
UV Transmission	UV transmission at 365 nm - 0% UV transmission at 313 nm - 0%
Packaging	Each roll is wrapped with EPE foam sheet and packed in a plastic bag
